**DATE:** 2011 – 2012  
**ADDRESS:** KM 32 ROAD TO THE PACIFIC SEA  
**SYSTEM:** FORSA ALUM

# HOUSES

Las Lilas  
Guatemala

## SUMMARY

2 floors, 240 m2 houses with lots of architectural details on facades and sloped concrete slabs.

## FORSA SOLUTION

One Forsa Alum set to pour ground floor including all the cornices, sills and architectural details. A first floor Forsa Alum set to pour monolithically walls and sloped slabs as roof.

## ACHIEVEMENTS

The whole building structure was built with concrete, offering stability, safety, and durability over the time.

One floor poured per day, Project time was shortened 60%.

Every detail was poured monolithically with great quality reducing subsequent processes, time and cost.
